

FREE SEMINAR ON ACHIEVING WATER MANAGEMENT SOLUTIONS

This seminar will provide practical specialist advice and support for businesses on water management to identify and deliver resource and cost savings. The seminar will feature technical advisors, industry experts and regional best practice case studies on the practical applications that can be implemented and the support available.

Reduce Consumption, Optimise Efficiency and Deliver Cost Savings

24 September. Energus, Lillyhall, Cumbria. CA14 4JW

Who should attend?

Water could be costing your company over 1% of business turnover. The seminar is aimed at all businesses and organisations that use water, and want to reduce their consumption, water charges and minimise effluent discharges. The seminar will provide practical advice on how reducing water can not only help you to save money, but also contribute towards compliance with current and future legislation.

Why should I attend?

The areas that will be covered during the seminar include:

- Examples of best practice within the region to reduce water use and achieve savings
- Water saving devices and practical advice to improve water efficiency
- Water efficiency targets and responsibilities of a water company
- Water reuse and recycling opportunities
- Minimising trade effluent discharges
- Grants, incentives, support and guidance available

Improving water efficiency and management across your business can help increase your company's performance, form better relationships with stakeholders and remove potential production bottlenecks.

Places are limited for this seminar, so register now to ensure you don't miss out.

For information and details on how to book a place for the event please see overleaf, and complete the following form.
