

Lifestyle Choice - Climate Change and Low Carbon Transition

West Cumbria Community Conference 2010

**Friday 26th March
Samuel Lindow Building,
UCLan at Westlakes
9.30am to 3.00pm**

Climate Change is a big long-term challenge for West Cumbria; and it affects us all, as the November floods demonstrate. It is also an opportunity to create new ways of working, new businesses, new infrastructure, and new ways of living, to make the “Lifestyle Choice” of transition to a low-carbon use economy, environment and society - to a sustainable community.

Among the speakers and presenters will be senior political, business and community figures, including UK Government, Energy Coast West Cumbria, Councils, Universities, local businesses, Third Sector, and Community groups and organisations.

Get involved in planning this new future: think globally; act locally.

Places are limited, so complete and return the attached booking form to Cumbria CVS by Monday 15th March.

This event is kindly sponsored by the Nuclear Decommissioning Authority and hosted by UCLan - Westlakes Applied Policy Science Unit (APSU)

Supporters of the event include Britain's Energy Coast West Cumbria Board, Sellafield Ltd, the University of Cumbria and Cumbria CVS.
